OBJECTIVE

Versatile Software Engineer skilled in building fast, scalable, and user-focused web apps using React, TypeScript, and Next.js. Passionate about clean code, AI-powered tools for code quality, and modern UI/UX. Thrives in agile teams, shipping impactful features with speed and precision..

EDUCATION

Bachelor of Technology (CSE -DS) Dr. A. P. J. Abdul Kalam Technical University 2020 - 2024

SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), React Native, TypeScript, Redux Toolkit, HTML5, CSS3, Tailwind CSS, Bootstrap, Material-UI

Testing & Quality: Jest, React Testing Library, GitHub Copilot, Unit Testing

Backend & DB: Firebase, MySQL, REST APIs

Programming Languages: JavaScript, TypeScript, C++, Python

Tools & Platforms: Git, GitHub, Jira, Vercel, Netlify

AI & Data: AI-driven Code Optimization, Data Analysis, Tableau, Web Scraping

Others: SaaS Application Development, Responsive Web Design, Agile Methodologies

Soft Skills: Communication, Problem-solving, Adaptability, Teamwork, Leadership

EXPERIENCE

Software Engineer February 2024 - Present
Bakingo (Floweraura)

- Recently contributed to the Bakingo Retail mobile app using React Native and Redux Toolkit, managing end-to-end UI development and API integrations to ensure seamless performance across devices.
- Developed dynamic React.js components for order tracking, reducing placement errors by **38%** and improving user engagement through responsive, accessible UI.
- Achieved **95%+** unit test coverage using Jest, significantly enhancing release stability and minimizing production bugs.
- Optimized app performance by **25%** with lazy loading, code splitting, and asset optimization for smoother user experience.

Freelancer December 2023 - February 2024
Zariyaa

- Partnered with the client to design and develop a custom React.js application, delivering a seamless user experience aligned with specific business needs.
- Built the app end-to-end—from project setup and component architecture to performance tuning—for scalability and long-term maintainability.
- Integrated third-party APIs to power core features, automating workflows and enhancing operational efficiency.
- Delivered a production-ready solution ahead of schedule, showcasing strong technical ownership and client-focused execution.

ReserveGo

- Built scalable, SEO-optimized web apps using Next.js and TypeScript, improving performance and reducing page load times by **30%**.
- Developed reusable React components and implemented efficient state management to streamline data flow and reduce code complexity.
- Integrated external APIs to enhance reservation workflows and collaborated with backend teams, resulting in a **90%** improvement in app functionality and user satisfaction.
- Leveraged TypeScript for strict type safety, minimizing runtime errors and boosting maintainability, readability, and overall developer productivity.

PROJECTS

Bakingo Retail Developed and maintained the Bakingo Retail mobile app using React Native and Redux Toolkit, managing complete UI implementation and seamless API integrations to ensure smooth user experience and reliable data flow.

LegalAI Developed an AI-driven legal advisor application using ReactJS, offering real-time legal guidance to help users navigate complex legal issues efficiently. Integrated advanced machine learning algorithms to provide intelligent responses.

Zariyaa Designed and developed a highly interactive, scalable web application as a freelance project, featuring seamless API integration and Redux Toolkit for efficient state management. Leveraged Material-UI to create a sleek, user-friendly interface and optimized performance for fast, smooth user experiences.

ReserveGo Led the frontend development of a restaurant reservation platform, enhancing customer feedback and marketing features for a streamlined dining experience. Utilized Next.js and TypeScript to build SEO-optimized, high-performance web pages, improving page load times and overall performance.

MovieHub Built a dynamic movie streaming app using React, Firebase authentication, and a responsive design for a seamless experience across devices. Integrated movie data APIs and personalized features, significantly improving user engagement and session durations.

INTEREST AND HOBBIES

- Music, Sports, Travelling, Socialising.
