

ANSHIKA SINGHAL

+91 9368012088 | singhalanshika82@gmail.com | [Linkedin](#) | Gurugram, Haryana

OBJECTIVE

Software Engineer with 1.5+ years of experience in Angular, TypeScript, and frontend development. Skilled in building scalable web applications, reusable UI components, and integrating REST APIs. Hands-on exposure to Java backend development, AI-powered features, and cloud technologies.

WORK EXPERIENCE

Associate Software Engineer

October 2024 - Present

Accenture, Gurugram

- Developed and maintained enterprise web applications using Angular and TypeScript, improving UI responsiveness and reducing page load time by 20%.
- Upgraded the application to the latest Angular version, enhancing performance, maintainability, and alignment with modern coding standards.
- Contributed to AI-powered chatbot integration, reducing manual support effort and improving user engagement by 15%.
- Collaborated with cross-functional teams and integrated Java-based REST APIs to ensure seamless end-to-end functionality and timely delivery of features.

Machine Learning Intern

March 2023 - August 2023

Feynn Labs Services.

- Contributed to AI product and service prototyping alongside an experienced team.
- Contributed to market segmentation by applying machine learning techniques for insightful data analysis.

SKILLS

Frontend: Angular, TypeScript, JavaScript, HTML5, CSS3, Signals, Observables, Component Architecture, Lifecycle Hooks

Backend: Java, REST API, AWS Cloud Fundamentals

Tools: Git, GitHub, Postman, VS Code, GitHub Copilot

EDUCATION

Bachelor of Technology (CSE - DS) - Dr. A.P.J. Abdul Kalam Technical University

2020 - 2024

CGPA: 8.9

PROJECTS

- **Legal-AI (AI based Legal App):** Developed an AI document assistant using a Python backend and JavaScript frontend to generate automated contract drafts, legal summaries, and terminology explanations ([Link](#))
- **Budget Planning System:** Engineered a responsive financial management application using Angular to provide dynamic data visualization and real-time expense tracking for users ([Link](#))
- **Cloudify: Weather App:** Built a REST API driven weather application using JavaScript to display live meteorological data, including humidity levels and wind speeds for global cities . ([Link](#))

CERTIFICATIONS

- GH-300 GitHub Copilot
- AWS Cloud Practioner
